PROJECTS

MovieNest

React | TMDb API | JavaScript | HTML | CSS

A dynamic movie search and discovery web application built with React. Integrates with The Movie Database (TMDb) API to provide real-time movie data.

- Allows users to search for movies and view key details like ratings, release dates, and overviews
- Features categorized movie listings including Top Rated, Popular, and Upcoming
- Utilizes React components, hooks, and state management for a responsive user experience
- Implements clean UI/UX design principles and mobile responsiveness

PhoneStore

Full Stack Project | MERN Stack (MongoDB, Express.js, React, Node.js) | Netlify | REST API

A complete full-stack e-commerce web application for mobile phones, built from scratch.

- Developed both frontend and backend using the MERN stack
- Implemented product listings, detailed views, filtering, and shopping functionality
- Created a custom RESTful API with Express.js and Node.js, with MongoDB

Portfolio

MERN Stack (MongoDB, Express.js, React, Node.js) | React-Bootstrap

A personal portfolio web application designed to showcase development projects with a clean and responsive UI.

- Integrated a contact form with backend handling via Express.js
- Displayed projects using static JSON data on the frontend
- Styled the UI with React-Bootstrap for responsiveness and modern design
